

Spirometry Refresher Workshop

Workshop recommended to those who are currently performing Spirometry in any Professional setting, General Practice, Occupational Health and Corporate Wellness

GPS: YOU MAY APPLY FOR CPD POINTS IN THE RACGP QA & CPD PROGRAM VIA THE COLLEGE'S ONLINE SELF-RECORD FACILITY.

When: Thursday 14th October 1pm-5pm
Venue: CWA House West Perth
Registration closes: Wednesday 6th October

Cost: \$220pp (inc GST)
Workshop materials included
Spirometry equipment provided

This workshop will provide an opportunity for those performing spirometry to update and refresh their knowledge, and for those who may also be a little unsure or lack confidence in their skills, to gain additional training experience. Refresher workshops are recommended every two years. The Workshop will review: the International Spirometry Guidelines, test performance and correction of patient technique, result interpretation and reporting.

Participants are encouraged to bring along questions, queries, and problems that they have encountered and although equipment will be supplied, they may also bring along their own spirometers for general model-specific questions. Participant experiences will be 'workshopped' during the session. Attendees will receive a certificate from ProHealth Training confirming attendance at a spirometry refresher and currency in knowledge base.

ProHealth Training is Western Australia's leading provider of spirometry training courses including the MineHealth Spirometry Course, the industry standard required for the Dept of Mines and Petroleum (DMP) Mine Workers Health Surveillance (MWHs) programme. Trainers: Sally Young and Bill Smith are both Senior Respiratory Scientists with considerable experience in lung function testing, teaching and training with over 50 years combined experience between them.
